

Cool Standard

The standard cool color scheme is one of our most popular designs. The blues take on a deeper navy tone and are contrasted by strong warmth in both cherry flooring and wood-grain cabinets. The walls in our standard designs are light and bright which enhances the standout feature of the blue accent walls. Accent wall color can be applied to any area in which you wish to create focus and a pleasing visual break. The resulting design is fresh and crisp with a touch of warmth to complete the space.

Green Standard

The Green Standard design pairs an inviting shade of green with a hint of blue. The Pearl Washed Wood commercial-grade vinyl flooring brings a modern touch throughout the space and coordinates well with the gray undertones in the Storm colored cabinets. The door profile is contemporary and clean. The accent walls become a strong focal point and tie the greens together throughout the space. This design maintains a crisp, fresh feel without being cold or clinical.

Warm Standard

The standard warm color palette is a rich, deep selection of materials against an inviting, bright wall color. The cherry flooring in our best Amtico resilient commercial-grade vinyl is one of our most versatile materials. Here it works hand-in-hand with the wood-grain cabinets and deep counter tops to provide contrast to the wall color. The accent wall color picks up on hues in found in the counter top, flooring, and upholstery materials to create a very warm cohesive look throughout the space.
